

The ERGOMAT Super-Safe Ergo anti-microbial mat is designed for critical environments where liquid on the floor creates the potential for mats to hydroplane, causing serious injury. The underside of the mat is equipped with suction cups which grab the floor for added traction and safety, and the premium rubber withstands a variety of rigorous cleaning regimens.

Unmatched Safety Features

- Molded beveled edges eliminating trip hazards
- Suction cups on the underside of the mat grip smooth, wet surfaces to eliminate the possibility of hydroplaning.
- Anti-microbial additive inhibits the growth of bacteria and mold in critical environments.

Highest Quality

- Virgin rubber
- Biocera A anti-microbial agent
- Proven ergonomic profile

The Super-Safe Advantage

- Frequent cleaning, even with caustics, will not affect mat properties.
- Appropriate for almost any working environment except those with oil exposures.
- Silicone and latex free
- Available in blue and green to address cross-contamination concerns

3-Year Warranty

All Ergomat product lines are conditionally warranted against normal usage* 24 hours a day, 7 days a week. The warranty does not cover damage caused by the mat being dragged or pulled from a heavy load or items being pushed or dragged across the product, such as skids or pallets. The warranty against chemicals, oils, liquids, or other matter differs with the type of mat. Please consult your dealer or an Ergomat Rep to select the correct mat for your environment. The warranty periods starts from the date of purchase. The warranty only covers the replacement of the product, no direct or indirect costs are covered.

* It is considered normal usage when a person stands or walks on the Ergomat with regular footwear in an environment where the temperature is under 25° C (77° F) and the humidity is below 80%.

Properties**ERGOMAT Super-Safe Ergo**

Material	EPDM Rubber
Anti-microbial Agent	Biocera A
Color	Blue, Green
Weight	3.5 kg // 7 lb 11.5 oz
Size	60 x 90 cm // 2 ft x 3 ft
Back Side Suction Cups Circumference	22 mm // 0.87 in.
Suction Cups per 60 x 90 cm // 2 ft x 3 ft	64
Thermal Properties	
Minimum use	40°C // 40°F
Maximum use	140°C // 284°F
UV Resistance	Good
Warranty	3 Years

Resistance Chart

Outside	Good	This chart is based on prolonged and intensive immersion in the listed chemicals and liquids identified.
Mineral Oils	Bad	
Vegetable Oils	Depends on concentration	
Coolants	Bad	The word "Depending" is used when the resistancy depends on the specific chemicals used as well as concentration. A test should be conducted prior to installing the mats.
Bases pH: 7- 9,5 pH: 9,5-14	Good Good	
ACID pH: 2-7 pH: 1-2 pH: < 1	Good Good Bad	
Alcohol	Good	
Disinfectant Liquids	Good, depends on concentration	
Thinners	Bad, depends on concentration	In general, "Bad" indications cover immersion and thus in cases with shorter exposures or limited spillages the rating could go to Medium or Good.
Water and chlorine	Good	
Halogenated Organic	Bad	When in doubt, contact Ergomat directly at: (DK) +45 70 22 18 40 (US) +1-440-282-4651
Softeners	Bad	
Acetates and Aldehydes	Depending	
Acetone	Good
