CATALOGUE 2023

DMR
SRL

Keeping on to pursue the principles
of Lean Production, DMR aims to spread the
importance of safe working environments.
Working safely means working better, leaner and
at the same time reducing the risk of damage to
people and property.

Active since 2008, DMR widened its horizons
abroad in 2017.

Its purpose is to provide tailor-made solutions
based on the needs and requirements of its
customers.

Who we are
DMR is an Italian company focused on the manufacturing and supplying of solutions for safely workplaces and environments. Its purpose is to provide tailor-made solutions based on its customers' needs and requests, giving them a purchasing experience in total comfort and assistance.
DMR work teams is young and, at the same time, characterised by 26 professionals who are constantly updating and searching of new solutions in line with the development of new technologies.

What we offer
Inside its portfolio, DMR includes and proposes different types of products: from the WCM/Lean solutions to the anti-slip fiberglass ones, added to the absorption, ergonomic products, protection covers catalogue and the led technologies, to make some examples. And precisely with regard to this latter sector, in 2017 DMR begins its made in Italy production of led signs and projectors for safety signage.

Mission
Its history dates back over ten years. Founding DMR in 2008, Marcello De Marco inspires himself and the company to the philosophy and principles of the Lean Production. In 2018 DMR widens its horizons abroad with the idea to support also companies outside the Italian territory, for example by establishing a collaboration in Romania as its on-site representative. Other collaborations have also been started with distributors on site in Greece and Israel. In 2022 DMR participates in the 'Italian Yellow Directory in the Gulf' project with the Italian Chamber of Commerce and opens a representative office in Dubai.
DMR mission is offering quality products and services promoting the continuous improvement and reduction of costs.
DMR would like to remind that a safely workplace achieves two goals: if from one hand it gives to the workers the opportunity to feel safe, at the other hand it allows to the company to avoid risks for people and properties, counting on a better and leaner production.

Vision

• INNOVATION
• QUALITY
• PROFESSIONALISM
• COMPETENCE

These values are the result of a constant search aimed at improving and applying the Lean Manufacturing and Lean Accounting, that bring benefits to companies concerning increase of safety, operators well-being and economic cost savings. DMR sales network consists of qualified personnel in both commercial and technical fields, who is able to implement projects and technical solutions for any particular need.

Services

• Customer consultancy
• Assessment of each individual requirement
• Quotation of the requirements
• Supplying (with eventual customization of some products)
• After-sales technical and commercial assistance
• A logistics department able to meet the rapid delivery of goods

ADHESIVE SIGNAGE

ADHESIVE SIGNS

Suitable for communicating any type of safety message and/or instruction, adhesive signs are easy to install and allow for effective communication. You can request the production of any sign you want, from standard signs to customised signs with images, text and your logo.
You can also choose the size that best suits your needs.

ADHESIVE SIGNS: CHARACTERISTICS, SIZES AND TYPES

SQUARE Base/Height sizes	RECTANGLE Base/Height sizes	CIRCLE Diamater size	CIRCLE Diameter size	TRIANGLE Side size
cm 24 x 24	cm 24 x 34	cm 24	cm 69	cm 24
cm 33 x 33	cm 30,5 x 23	cm 31	cm 81	cm 31

ADHESIVE SIGNAGE

FLOOR MARKING SIGNAGE

Floor marking signage is highly visible and doesn't fade over time. It is ideal for any lean manufacturing programme, such as 5S or Six Sigma and WCM. Since it communicates safety instructions to operators, it withstands pedestrians and vehicles crossing. These signs are easy to install and reconfigure, with considerable saving in money and time. These are its characteristics: 0,90 mm thickness, adhesive back, possibility to customize in photoluminescent version. **It is possible to customize with any type of picture, logo and text in every languages.**

XTREME

XTREME has been designed and produced with a surface lamination, to provide our floor marking an extreme resistance to forklifts pivoting (where also concrete is usually damaged) and ease of cleaning, even for removing debris from forklifts wheels. XTreme has a rubber based adhesive with integrated net and bevelled edges. It can be reusable.

ANTI-SLIP FIBERGLASS

ANTI-SLIP FIBERGLASS STAIR TREADS

A fast and economic solution to eliminate the risk of slipping. Fiberglass stair treads create anti-slip, safe, resistant and long-lasting surfaces in environments where floors tend to be wet and oily.

Stair treads are the ideal solution to make stairs safe in all people and industrial environments. They can be applied on existing wooden, concrete, steel treads, etc. Its special non-skid execution (with silica grains integrated in its structure), ensures a very good slip resistance in all conditions (Ex. water, ice, grease, etc...). Laminates are equipped with a yellow frontal bar that makes the tread clearly visible for the foot, increasing the safety characteristics of this product. It is the fast, economic and ultimate solution to make any stair anti-slip, even when there are very slippery liquids or materials. **R13 ANTI-SLIP CERTIFIED**

It is possible to customize this product up to maximum 3 m length x 30 cm depth

INSTALLATION ON GRATING use bolts with self-locking nuts and washers.

INSTALLATION ON PLATFORM: use self-drilling screws and/or sealing adhesive.
**CUSTOMIZABLE SIZES*** Realizable sizes after cut to size

Fast and easy to install

R13 CERTIFICATIONt report 247047 Tes/1
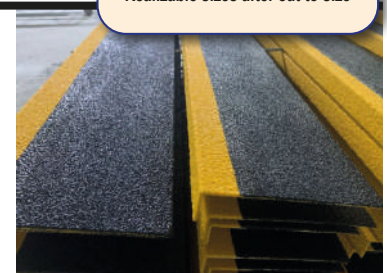

FAST AND EASY TO INSTALL

This new fiberglass anti-slip edge is the cheap solution to solve safety problems concerning stairs and stairways. It is characterized by a bevelled shape, permanent anti-skid surface and yellow colour to make it visible even in low visibility conditions. Easy fastening by polyurethane adhesive or nuts and bolts.
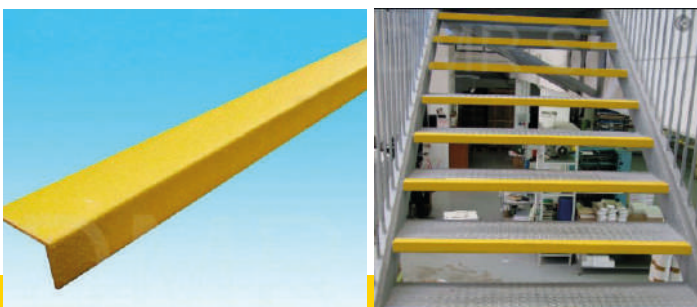

It is possible to customize this product up to maximum 3 m length x 7 cm depth

| Safety angle Code	SIZES
ANG300070	3 m width x 7 cm depth, 3 cm lower edge, 3,2 mm thickness
ANG50070	50 cm width x 7 cm depth, 3 cm lower edge, 3,2 mm thickness
ANG60070	60 cm width x 7 cm depth, 3 cm lower edge, 3,2 mm thickness
ANG75070	75 cm width x 7 cm depth, 3 cm lower edge, 3,2 mm thickness
ANG100070	100 cm width x 7 cm depth, 3 cm lower edge, 3,2 mm thickness

ANTI-SLIP FIBERGLASS

ANTI-SLIP FIBERGLASS LAMINATES

An absolute requirement in any working environment. Made of FRP (Fiberglass Reinforced Polyester) with monolithic structure, with glass fabrics (Mats) layered together with a resistant chemical polyester resin-based mixture matrix. With permanent anti-skid: pure quartz grains integrated in the top part of the panel with vinyl ester resin protective double layer. Ideal to make any surface anti-slip, fast installation by sealing adhesives or nuts and bolts. Injuries that often occur in the workplace represent a big problem for all companies: in addition to physical damage for any operator involved, the loss of profitability that comes with it has serious consequences in the company economy. A research done about dynamics that cause the most common injuries reveals that the highest number of accidents is due to little resistance to slipping of walking floors. Anti-slip laminates and gratings are the best solution: their surfaces guarantee a higher level of slip resistance than any other kind of materials. Their use will be appreciated by operators (who will be able to carry out their daily work activities) and even more enhanced by trade unions (especially sensitive to problems concerning safety in the workplace). Grey colour.

Code	Sizes
LAM10003000	100 x 300 cm, thickness 3 mm
LAM10002000	100 x 200 cm, thickness 3 mm

2 Sq m minimum order - Customizable sizes on request
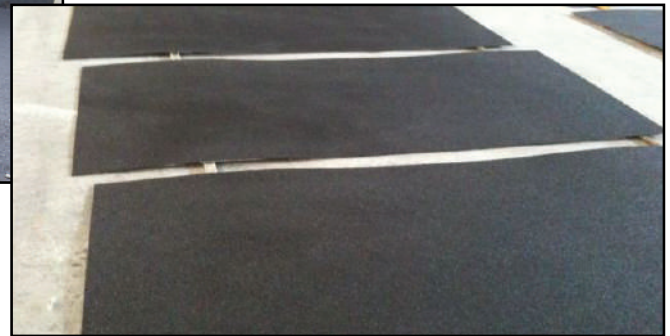

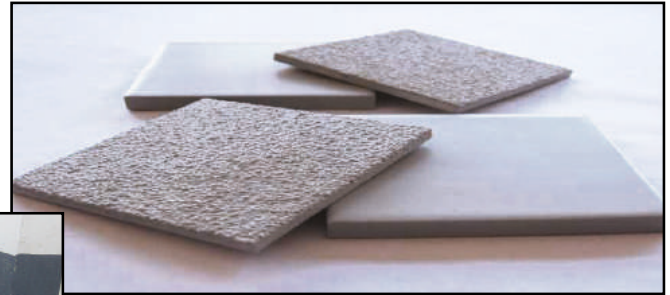

ANTI-SLIP FIBERGLASS GRATING

INTEGRATED NON-SKID

Gratings are made with an innovative anti-skid surface composed of quartz grains being an integral part of this product.The panel surface is polymerized through a special treatment with vinyl ester resis double layer that gives to grating an exceptional corrosion resistance a superior grip compared to all other kinds of gratings (also when the surface is wet, frozen oily greasy) and a considerable resistance to wear. Anti-skid material meets R13-V10 classification criteria, in compliance with DIN 51130 regulation.

MAIN ADVANTAGES

- Anti-skid surface
- Chemical resistance
- Lack of maintenance
- Fire-resistance
- Lightness
- Insulating - non conductive
- Mechanical resistance

ADHESIVE SIDE

Our original Traffic Appiccicoso Adhesive-Backed Mats range offers ahighly absorbent, extremely durable and low-profile floor safety solutionthat's perfect for reducing slips, trips and falls in high-traffic areas.
It traps dirt, grease, salt, mud and moisture to prevent it being trackedthrough your premises.
And its innovative construction is effortless tomaintain and easy to clean using everything from a vacuum to acommercial floor scrubber.

The exclusive adhesive sticks to most commercial floor surfaces andstays put, preventing the dangerous shifting, bunching and flippingassociated with traditional rubber-backed mats.
Available in pre-cut mat lengths or continuous rolls, up to 30m long, forcustomisable floor protection that stops dirt at the door.

ICE ALERT

Ice Alert is an independent and patented safety product that visually alerts people when environmental temperature decreases and the danger of ice may occur. Its reflectors become blue when temperature decreases below 5°C. It doesn't require any electrical connection or battery.

It is equipped with DIBOND or box section aluminium panel with customizable graphics. Available sizes: 40x60 cm and 17,5 x 25,5 cm, this device has 15,5 cm diameter. Some examples below.

LED PANELS

LED LIGHTING SIGNS

Lighting devices for safety at workplace. This panel can be single-sided or double-sided, it is possible to manufacture it in outdoor Dibond version or in plexiglass backlight version. Possibility to customize its graphics, letters and led lights. It is possible to light the Led sign with a proximity sensor (not included), and to be provided with other sensors in order to reach a larger area. Light can be flashing, even with different colour lights (ex. red/green). DMR manufactures its signs in Italy, offers warranty and gives its customers the possibility to 100% personalize its products, providing complete assistance. Everything is made in Italy.

How does safety signage projection work?

1. In industrial working environments, it is essential to equip the production systems with a proper safety signage and signs concerning the production line. For this purpose, experience in this field has led DMR to create an innovative project regarding the projection of this information signage.
2. This type of signage is characterized by a lot of advantages, for both its visibility, given that it is not subjected to deterioration and it is visible in illuminated and in very dark environments, and also for time-saving since it's easy to install and long-lasting.
3. Projected signage only requires an image projector (called "gobo projector") and an image support (called "gobo").
4. Gobo is positioned inside the projector, completely customizable and included in the supply of projector, it is comparable to a slide, but more resistant and graphically defined because it is manufactured on a laser-marked borosilicate support, for this reason colours won't be subjected to deterioration over time.
5. The projector is installed in a confortable space that is adjacent to projection area, such as ceiling, while the selected safety message is projected on the working surface, also allowing to act on different parameters, such as: focal, inclination, rotation and distance; the system guarantees a good margin of modification, even after installation has already been carried out.

PROJECTORS advantages

- long-lasting
- no wear due to traffic
- money saving
- no need to repaint
- fast installation
- they never fade
- high-visibility
- they attract more attention
- simply update

DMRLED10

DMR LED10 is a projector with a compact and rugged design, small and lightweight, capable to adapt to any working environment (even dusty), and thanks to the absolute brightness of its led source, it can counteract the normal lighting in industrial infrastructures.

We reccomend you to use it for signage projection having size from 30 to 120 cm and variable height from 2 to 4 metres.

The possibility to use interchangeable optics makes the use of this projector versatile, in both very high environments and in environments where mezzanine structures force to use it at maximum 2,5 m height.

Available optics are: 10° , 15° , 20° , 25°.

Example of image opening at different distances with focal (opening 20°) PRODUCT CODE DMRLED compatible with 10,15,20,25° objectives.

Projectiown of DMR-LED40 towards door opening with sensor.

Projection example of signalling the doors opening direction. This projection is activated by a detection sensor, that every time detects the presence of a pedestrian in the proximity of doors, gives consent to turn on the projector, that will remain activated for a pre-set time.

The possibility to use the accessory presence sensor is useful, since it makes the projection more dynamic, and as a result, it will have a greater visual impact; at the same time, it guarantees a longer durability of the illuminated source over time, as well as it ensures energy saving.
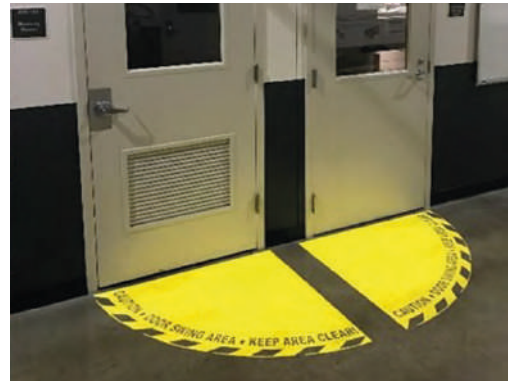

PROJECTORS CONFIGURATION

Since it is about projection, the size of the projected signage stays within one of those parameters that can be easily managed just acting on one of the three fundamental elements of the system. This means that in a projection system the projected image size depends on these three factors: FOCAL - GOBOS IMAGE SIZE - PROJECTION DISTANCE. By varying just one of these three elements, it will be possible to modify the projection size. Naturally, it is important to guarantee some Standards, that can be substitutive or integrative of the signage.

For this reason, as for horizontal self-adhesive and printed signage, DMR suggests some dimensional standards and indicates here below some examples of projectors configuration.

We reccomend you to rely on DMR staff for defining the projector configuration right parameters.

LED PROJECTORS

DMRLED80

Made in Italy

DMRLED80 is the LED projector perfect for indoor use and ideal for bright signalling.

It is characterized by an attractive but minimal design and low energy consumption but with a high lighting efficiency. Its recommended use is to project signage with size from 30 to 350 cm and heights from 4 to 10 mt.

The chance to use different optics that can be interchangeable makes its use versatile for all the environments.

The available optics are : 10°, 15°, 20°, 25°.

The projector is supplied with an optics and the first GOBOS standard.

It has a rotation mechanism that can make the projection better and it can shows rotation indications.

The projection can be controlled also through the sensor, to detect the means or pedestrian traffic.

DMRLED80WP
PROTECTION RATING IP54

DMRLED80WP protection rating IP54:

it is resistant to splashes and dust, also for food indutries.This is the LED projector perfect for indoor use and ideal for bright signalling

It is characterized by an attractive but minimal design and low energy consumption but with a high lighting efficiency.

Its recommended use is to project signage with size from 30 to 350 cm and heights from 4 to 10 mt.

The chance to use different optics that can be interchangeable makes its use versatile for all the environments.

It has a rotation mechanism that can make the projection better and it can shows rotation indications.

The projection can be controlled also through the sensor, to detect the means or pedestrian traffic.

PROJECTORS

LIGHTING ROUTE 50

Easy-to-install projector designed to create highly efficient light paths. Designed to supplement or replace classic adhesive signage. Aperture ratio 1:1.15.

The dimensions of the path vary depending on the installation height, recommended between 3 and 7 metres, with a bar length ranging from 3 to 8 metres.

It is possible to combine several Lighting Route 50s to create a longer route.

If desired, the Lighting Route 50 can be combined with a control unit or motion sensor.

LIMITS TO WARRANTIES AND LIABILITY FOR INSTALLATION:
D.M.R. S.R.L. is only responsible for the quality and integrity of the product, according to the standards in force, and not for the installation of the same, if not carried out by D.M.R. S.R.L direct personnel.
In fact, for the installation and assembly it is necessary the presence of an electrician or electronic technician, to be paid by the buyer, who will configure and take care of the maintenance of the single projector or of the combination
"projector + sensor/control unit", with exclusive responsibility of the same for problems related to the assembly, or malfunctions.
D.M.R. S.R.L remains however available, if required, for an initial training of the technician, which will be provided remotely, regarding the technical characteristics of the purchased product.
D.M.R. S.R.L will take care of checking and testing the integrity and correct functioning of the product at the time of supply.
We equally invite the purchaser to verify the integrity of both the packaging and the product at the date of delivery, since from that moment the short term for the complaint of defects starts.
Furthermore, D.M.R. S.R.L declines all responsibility for possible malfunctions that arise as a result of bad assembly or tampering of the product by third parties.

INSTALLATION HEIGHT IN METERS

Example: Installing the projector at a height of 5 m it projects a strip 570 cm long and 8 cm wide.

HI-TECH RADIO MOTION SENSOR

Our new "Hi Tech Radio Motion Sensor" is an innovative product, realised with new generation technologies, capable of efficiently managing a multi-voltage input/output system, fully programmable in all its functions thanks to a comfortable Oled display and to a remote control through the dedicated webapp.

It can be used standalone or connected to other 'Hi Tech Radio Motion Sensors' thanks to its 2.4GHz radio connectivity with proprietary protocol for stable and secure signal transmission.

It allows the realisation of electronic systems for company security and more, thanks to its multitude of multi-voltage inputs and outputs, and also integrates perfectly with pre-existing systems. In addition, thanks to its radio wave signal transmission, it allows the realisation of complex systems even at great distances (range of about 300 metres - variable according to the building structure), allowing considerable savings in costs and time for the realisation of the electrical system.

new Hi Tech Radio Motion Sensor

1 **It integrates perfectly on existing installations**

2 **Radio wave transmission**

3 **Remotely programmable**

4 **It allows the realisation of complex installations**

DMR - SENSRADIO

MASTER AND SLAVE SENSORS

Sensors are independent from the sign and are connected through simple and fast-to-install connections. Slave sensor is a infrared detector compatible with DMR Hi-tech Motion Sensor control system.

HI TECH Motion sensor is a motion detection sensor, designed for applications in industrial environments and in places mainly dedicated to safety.
It is composed of a multifunction main board capable of managing differents inputs and outputs.
The card is capable of managing inputs:
4 infrared detection sensors, one Master and three slave type, manageable at a maximum distance of 10 metres.
2 ultrasonic sensors for measuring distances that can be managed at 10 metres.
The card is capable of managing outputs:
up to 4 with 24V Led panels (connected in parallel on 2 terminals)*.
3 outputs with Relay for connecting LED10 - LED40 projectors and for traf-fic-light functions (for ex. fixed red light, flashing green light)*.
The card is equipped with a minidip selector from which it is possible to enable or disable functions (buzzer, flashing and Relay) and change the time to take action.
The sensor must be supplied with 220V 50Hz.

*depending on the use of the product and of its configuration, some input/output functions may differ from the information mentioned above.
PIR technical specifications (Infrared sensors):
detection range: <140°
maximum detection distance: 7mt

SLAVE SENSOR

This sensor is designed to be hung by means of magnets in order to avoid the perforation of metal shelving, and is equipped with plug-in support for wall fastening with screws and plugs. Optional motion sensor added to MASTER sensor in order to synchronize the switch-on of our LED devices from more areas.
It requires to be connected to Master sensor .

SECURSOFT / Non-toxic

SecurSoft arises from the need to satisfy the most different protection requests against any danger with a high shock absorbing ability and a practical flexibility. Non-toxic SecurSoft differs from all other materials for its high shock absorbing ability tested in compliance with EN 913 regulation of 2009 appendix C. **DESCRIPTION**: Non-toxic SecurSoft is composed of 42 square components whose size is mm 20x20 connected by a 3 mm thick core. Its original embossed surface makes any imperfection invisible and its longitudinal central tube allows the perfect consequentiality in case panels are placed side by side (for consistent wall surfaces) or the excellent juncture in case of winding (for poles, light towers, pillars, columns, handrails, etc). All this in order to achieve an incomparable aestethic pleasantness and an unbeatable tensile strength. Easy to install by means of a quick-setting brushable special glue, covering a surface of 2 Sq m for each panel (cm 100x200). **COMPOSITION OF COMPOUND**: SecurSoft is made of a closed cells solid polymer mixture having the ethylene-vinyl acetate characteristic odour, non-toxic and defined not dangerous (with regard to current regulations in force concerning safety EN 71 – 1:2011+A3:2014; EN 71 – 2:2011+A1:2014; EN 71– 3:2013; Reach Regulation 1907/2006/EC; EXP/2015/030; Regulation 1272/2013 Chapter 3 of the Treaty establishing the European Atomic Energy Community; 8457 regulation; 9174 regulation).

Available in these colours : White, sky blue, blue, green, yellow, orange, red, purple, grey, black, customizable in any RAL colour.
Safety : It fulfills directive EN 913 of 2009 appendix C. It fulfills these directives concerning safety EN 71 – 1:2011+A3:2014; EN 71 – 2:2011+A1:2014 ; EN 71 – 3:2013; Reach Regulation1907/2006/ EC; EXP/2015/030; 1272/2013 regulation; Chapter 3 of the Treaty establishing the European Atomic Energy Community; 8457 regulation; 9174 regulation, and according to the current research it's not considered dangerous.
Flexibility : Excellent to be adapted to any support.
Hygiene: Easy cleaning and maintenance with normal non-aggressive detergents.
Insulation :Thermal and acoustic.
Durability : Scratch-resistant, resistant to UV rays, molds, parasites, weather.
Ordinary maintenance : H2O + normal non-aggressive detergents and moistened cloth.
Extraordinary maintenance: Replacement of damaged panels because of an improper use.
Applications: Suitable for indoor and outdoor environments: gyms, schools, sports facilities, gardens; thanks to its extreme versatility is suitable for any kind of support: it protects and wraps many different surfaces and sections.
Technical Data : Panels size: max height cm 210 per maximum length cm 105, they can be consequential to each other through a section breaker.
Thickness : 20 mm +-10%.
Plate weight : 3 Kg/Sq m.
Density : 250 Kg/cubic m.
Fire class (reaction to fire): class 2 – Hardly flammable combustible material.

SECURSOFT / Fireproof

SecurSoft arises from the need to satisfy the most different protection requests against any danger with a high shock absorbing ability and a practical flexibility. SecurSoft fireproof cl. 1 Bfl-s1 – hardly flammable material and with a very slow flame spread, differs from all other materials for its high shock absorbing ability tested in compliance with EN 913 regulation of 2009 appendix C.
DESCRIPTION: Fireproof SecurSoft is composed of 42 square components whose size is 20x20 mm connected by a 3 mm thick core. Its original embossed surface makes any imperfection invisible and its longitudinal central tube allows the perfect consequentiality in case panels are placed side by side (for consistent wall surfaces) or the excellent juncture in case of winding (for poles, light towers, pillars, columns, handrails, etc). All this in order to achieve an incomparable aestethic pleasantness and an unbeatable tensile strength. Easy to install by means of a quick-setting brushable special glue, covering a surface of 2 Sq m for each panel (100x200 cm).
COMPOSITION OF COMPOUND: SecurSoft is made of a closed cells solid polymer mixture having the ethylene-vinyl acetate characteristic odour, flame-retardant cl. 1 Bfl-s1 (with regard to current regulations in force EN 13501 – 1 and EN 14041).

Available in these colours: White, sky blue, blue, green, yellow, orange, red, purple, grey, black, customizable in any RAL colour.
Safety : It fulfills directives EN 913 of 2009 appendix C; EN 13501 – 1 and EN 14041.
Flexibility: Excellent to be adapted to any support.
Hygiene: Easy cleaning and maintenance with normal non-aggressive detergents.
Insulation: Thermal and acoustic.

PEDESTRIAN CROSSING ELEVATED

The elevated pedestrian crossings are a good protection system for the "weak users" of streets; children, old people, pedestrians, cyclists. Its main purpose is to decrease the speed of vehicles without any negative consequence for the safety and without causing disadvantages to whom moves at the right speed. The elevated pedestrian crossing is an elevation plan change of the road through an elevation with edges next to the pedestrian crossings, with a 7% slope that makes easier the heavy means, first aid and public transport traffic. They provide no interruption to the pavement and improve the visibility. The corners have been renewed with these advanatges
1) Made of a single piece to make easier the installation; 2) Made of expanded polyurethane to be lighter compared to its size; 3) Yellow colored to highlight the pedestrian crossing points.
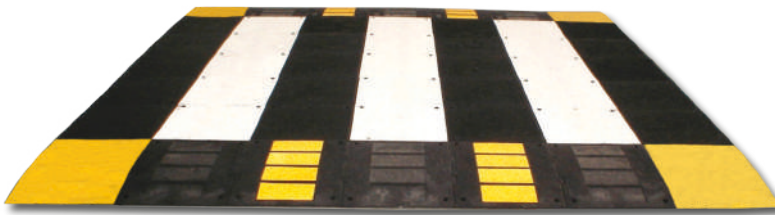

DMR-PP557B
White piece covered with reflective laminate . Size 50 x 50 x h 7cm.
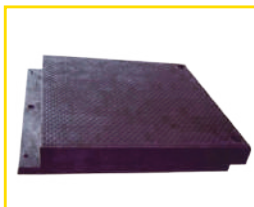

DMR-PP557N
Black chequer plate piece for pedestrian crossing.
Size 50 x 50 x h 7cm.

DMR-PP5107TMVN
Male black end piece without reflective laminate .Size 50 x 100 x h 7cm.

DMR-PP5107TFVN
Female black end piece without reflective laminate.
Size 50 x 60 x h 7cm.

DMR-PP567TFPN
Female black end piece without reflective laminate.
Size 50 x 60 x h 7cm.

DMR-PP5107TMVLN
Male black end piece without reflective laminate.Size 50 x 100 x h 7cm.

DMR-PP5107TFVLN
Female black end piece with reflectiveM laminate.
Size - 50 x 100 x h 7 cm.

DMR-PP6107AMG
Male corner piece, yellow for pedestrian crossing
Size 60 x 100 x h 7 cm.

DMR-PP6107AFG
Female corner piece, yellow for pedestrian crossing
Size 60 x 100 x h 7 cm..

OIL-ONLY PADS AND ROLLS / OPTIMAL QUALITY

Efficient and fast absorbency of oils and hydrocarbons spills but not of water.

Bright white pad
Bright white colour allows to understand when the pad is completely saturated with absorbed oily liquids, so you avoid to replace it when it still has absorbing capacity.

Fast absorbency
The pad begins immediately to absorb when it comes into contact with the liquid. You can use it on water or on the ground, it floats even when is completely saturated. It's ideal for outdoor use, it guarantees an efficient and fast cleaning, and helps to protect environment from contamination.

PADS FOR SPILLS AND SPURTS / OPTIMAL QUALITY

It absorbs spurts and spills and helps to keep floors dry and safe.

Fast action for a quick response. A polypropylene layer creates a wide surface that allows the pad to quickly absorb liquids. This product absorbs oils, refrigerants, solvents, water and a lot of chemical products.
This is a grey-black and lightweight thickness roll.
High absorbency guarantees a longer lifetime for the pad.
A big diameter polypropylene fibers texture creates a high absorbing surface. The 38 x 48 cm high-density pad absorbs 1,1 litre. The 76 cm x 46 m high-density roll absorbs 209 litres.
The quilting keeps the pad intact Infrared fusion points melt fibers layers among them. The pad does not flake even when it is completely saturated.
Pre-perforations to save money Rolls are each 19 cm vertically and each 43 cm horizontally pre-perforated.

PADS FOR UNKNOWN LIQUIDS

Absorbers for acids, bases and unknown liquids

Pads and rolls
100% polypropylene, it absorbs the most of caustic and dangerous liquids. The quilting is realized by means of ultrasound technology and gives it a strong and fast absorbency.
Specifically coloured
All absorbers are yellow-coloured in order to more easily identify them.

UNIVERSAL SOCKS / To contain and absorb

Universal socks (for oils, refrigerants, solvents and water)				
Item code	Description	Sizes	Quantity	Absorbency
A0909796	universal grey	8x122 cm	30 pcs	94,6LT each box
A0909797	universal grey	8 x 366 cm	10 pcs	94,6LT each box

Universal socks, high performance This 100% polypropylene sock absorbs oils, refrigent, solvents and water. It is ideal to face any tipe of spills, easy to suit and bend into any shape.

UNIVERSAL PILLOWS / For large drippings

Universal absorbing pillows (for oils, refrigerants, solvents and water)				
Item Code	Description	Sizes	Quantity	Absorbency
A0859815	universal	46x46 cm	10 pcs	87 LT
A0859816	universal	20x46 cm	20 pcs	87 LT

It quickly absorbs large amounts of liquids It is ideal when spills occur. The pillow large surface allows a fast absorbency, shortening the time to respond in case of emergency.

Pillows can absorb liquids in very small spaces
Pillows are easy to use in difficult-to-reach areas; under machineries, dripping pipes or small corners. One product for several uses.

Only one product for a wide range of uses
It is a very versatile product. It removes liquids on floors as a sock, contains drippings as a mat and absorbs as a pad.

Oil-Only SOCKS / To contain and curtail
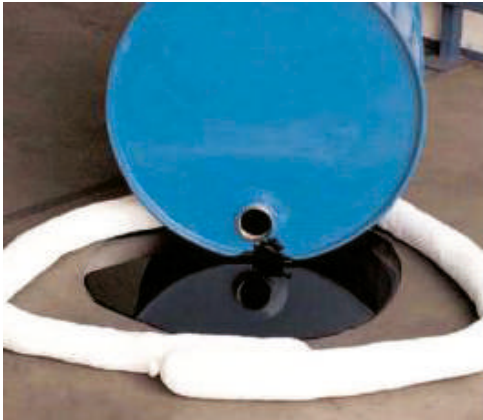

Oil-Only socks absorb oils but not water In case of oils spills, these 100% polypropylene socks are ideal. They absorb only hydrocarbons but not water, and can be used for a long time.

White Oil-Only socks (for oils but not water)				
Item Code	Description	Sizes	Quantity	Absorbency
A0789796	Oil-Only	8x122 cm	30 pcs	94.6LT

These pillows absorb oil but not water, even in the rain
Oil-Only pillows have a high absorbency of hydrocarbons on water, even in the rain.

Only one product for a wide range of uses Easy to use on basins and bodies of water. For fast interventions in case of spills.

Particular colour
White colour immediately allows to understand when oils and hydrocarbons have been absorbed.

PILLOWS / Ideal for outdoor use

White Oil-Only pillows (for oils but not water)				
Item Code	Description	Sizes	Quantity	Absorbency
A0829815	Oil-Only	46x46 cm	10 pcs	87LT
A0829816	Oil-Only	20x46 cm	20 pcs	87LT

ABSORBING BARRIERS/ Ideal for outdoor use

Control outdoor spills using our barriers A sturdy external coating includes a highly absorbent polypropylene interior.
Socks won't lose absorbed liquids even when they will be completely saturated, staying afloat.
A sturdy nylon rope goes through the barriers along their whole length, increasing their resistance and simplifying recovery operations.
Create your own personalized barrier Barriers can be connected among them through a steel carabiner, creating a customized barrier on bodies of water.

Skimmer
Tubular net skimmer separates oil from water in water collection basins, water wells, tanks or basins. Each skimmer absorbs up to 6,8 litres of oily liquids.

ABSORPTION

SOCKS / For acids and caustic substances spills

Socks to absorb caustic

This 100% polypropylene sock absorbs almost all types of caustic substances, unknown liquids, acids, bases and solvents. Its particular yellow colour indicates that one of these substances has been absorbed.

Yellow socks (for acids, caustic substances and unknown liquids)

Item Code	Description	Sizes	Quantity	Absorbency
A0909796	chemicals	8x122 cm	30 pcs	94.6LT

PILLOWS / For large losses

The pillow large surface allows a high absorbency, therefore a quick response in case of spills.
It absorbs liquids as a sock, collects losses as a basin and absorbs as a pad.

PORTABLE KIT FOR TRUCKERS

Universal PORTABLE KIT

Transparent bag to control its content.
This portable kit controls all types of spills. Thanks to its characteristic compact design, it is perfectly suitable behind the seat of a truck and is ideal for small spills that the driver may face every day. It is appropriate to absorb oils, refrigerants, solvents and water.

Content A0959844
20 Universal pads
3 Universal socks
1 Disposal sack with closure
1 Rapid response instructions manual

Code A0959844
It absorbs 33 L

Oil-Only KIT FOR TRUCKERS

Transparent bag to control its content.
This kit contains spills quickly in order to preserve the environment.
This Kit is easy to handle and is essential for a quick response, reducing damages as much as possible.
Oil-Only is suitable to absorb oils but not water.

Content A0979844
20 Oil-Only pads
3 Oil-Only socks
1 Disposal sack with closure
1 Rapid response instructions manual

Code A0969844
It absorbs 33 L

Haz-Mat KIT FOR TRUCKERS

Transparent and portable bag.
This portable Kit solves small spills problems. Thanks to its characteristic compact design, it is perfectly suitable behind the seat of a truck and is ideal for small spills that the driver may face every day.
It is appropriate to absorb acids, caustic substances and unknown liquids.

Content A0979844
20 Pads
3 Socks
1 Disposal sack with closure
1 Rapid response instructions manual

Code A0979844
It absorbs 33 L

DIFFERENTIATED WASTE

KRAFT RECYCLABLE BOXES FOR DIFFERENTIATED WASTE COLLECTION

DifferenZio is an ecological island that avoids to disperse colours in the environment. A system of modulable boxes to sort waste: paper, plastic, glass, metal and non recyclable, and in this way, to be eco-friendly. DifferenTio is an ecological island with five modular elements made of recyclable corrugated cardboard, to be installed in few seconds with extreme ease. The slightly hexagon shape of these boxes allows to assemble this ecological island in order to be perfectly suitable for any space needs, while the different colours of modules give a better visibility to waste destination.

DIFFERENTIATED WASTE

CORRUGATED POLYPROPYLENE BOXES FOR DIFFERENTIATED WASTE COLLECTION

Differenzio is an ecological island with SEVEN polypropylene modular boxes to be installed in few seconds with extreme ease. The hexagon shape of these boxes allows to assemble this ecological island in order to be perfectly suitable for any space needs, while the different colours of modules give a better visibility to waste destination.

Differenzio allows us to introduce on the market an exclusive product thanks to its graphics, used by different consortia, public bodies, municipalities, companies and private individuals, that have appreciated its practicality and suitability over time. In addition to this, the new box Differenzio, made of corrugated polypropylene, is appreciated for its higher durability guaranteed by its excellent mechanical properties of bumps resistance, by its good chemical properties of resistance to water, grease, alcohol and some solvents.

The new line of boxes designed for Differentiated Waste Collection is waterproof, lightweight, washable, easy to move, reusable and long-lasting, *thanks also to its 3 mm thickness.*
