

An anti-slip flooring is a need for any company, for several reasons, including health and safety regulations and standards imposed to companies by Legislative Decree 81/2008 Art. 63 Annex IV 1.3. DMR provides anti-slip floor coverings able to meet any specific requirement. They don't need any maintenance since they resist to both steam cleaning and detergents. Our range of anti-slip adhesive materials is suitable for multiple applications.

The standard range provides an instantaneous floor anti-slip covering, while the adaptable/conformable ones are conceived for irregular surfaces whose coating could have some difficulties, such as textured stairs, then we have **safety navy boat/water-resistant** that is used for food and shipping companies. Our material is extremely durable and is ideal as permanent anti-slip tape. It can be applied on most surfaces and ensures a high quality instantaneous anti-slip protection, able to satisfy worldwide safety standards. This material resists to temperatures below 30°C, classical sizes are 2,5/5/10 cm width with 18,3 m length. **WE CAN PROVIDE OUR TAPE IN ANY SHAPE AND FORMAT.**

ADVANTAGES OF OUR TAPE

1. Competitive prices
2. Wide range of available colours
3. Excellent performance
4. High durability
5. Permanent adhesion
6. Easy application

WHERE YOU CAN USE OUR TAPES

WORK ENVIRONMENTS - INDUSTRIAL SHEDS - OFFICES - WORKSHOPS - CHANGING ROOMS - SWIMMING POOLS - HOSPITALS - RESIDENTIAL CARE HOMES - SPORTS FACILITIES - MEDICAL OFFICES - MALLS - SCHOOLS - KITCHENS - RESTAURANTS - HOTELS - DINING HALLS - SUPERMARKETS - DEPARTMENT STORES - WELLNESS CENTRES - THERMAL TREATMENT CENTRES - PUBLIC AREAS - MARKET HALLS - ENTRANCES - STAIRWELLS - BATHTUBS - SHOWERS - BARS - HOMES

PHOTOLUMINESCENT SAFETY

It's a photoluminescent adhesive tape that accumulates light and releases it, by illuminating in the dark. It is available with many length and width sizes on request. It's ideal for operas and theatrical plays, or to create suggestive environments. During dangerous situations **photoluminescent safety** will be ready as an excellent anti-slip adhesive, to signal emergency exits and dangerous passageways, to make objects more visible at night, and much more.

CONFORMABLE AND ADAPTABLE SAFETY

This conformable/adaptable anti-slip product is composed of abrasive particles spread over a flexible aluminium support to adapt to irregular surfaces using its extremely high adhesive strength. For its great ability to adapt to all irregular environments, it is recommended for curved and non-shapeless surfaces, such as ladders and warehouse ladders, earth moving machines, walkways, etc...

SAFETY NAVY/BOAT - WATERPROOF TAPE

These waterproof products are ideal for people who experience sea life, for food environments and for showers. This waterproof range includes a unique coating able to ensure an anti-slip flooring with a smoother finishing, therefore it is possible to walk barefoot without risking abrasions and avoiding damages for skin, materials and wetsuits. Creating anti-slip surfaces in marine environments or in high humidity areas has always been a challenge, but with our waterproof products it is possible to achieve anti-slip flooring with the utmost ease. This material is ideal for safety in environments where food is produced, thanks to the absence of abrasive hollows and ledges and in high humidity areas, and as a tape for marine applications, changing rooms, boats and sports equipment, and for barefoot walking areas, such as showers, changing rooms, saunas, etc...It can be provided in any size.

STRENGTHS OF THIS PRODUCT

- **Unique anti-slip coating, highly effective.**
- **Absence of hard and rough granules.**
- **Permanent adhesive surface.**
- **Available in four basic colours: black, white, beige, grey and transparent. Available in any size and width.**
- **Easy and instant application.**
- **High efficiency as anti-slip tape for marine applications.**
- **Create a very good anti-slip flooring, it's an excellent safety tape.**

ELASTIC SAFETY

This range of product is composed of ideal, anti-slip and non-abrasive material, with the same qualities of waterproof tape, and an anti-slip flooring with a light elasticity and a soft relief. Depending on its quality, ELASTIC SAFETY NAVY/BOAT can be provided in different colours. This material is often used to manufacture anti-slip tapes for marine applications.

SAFETY NAVY/BOAT

Anti-slip aluminium

This anti-slip product is ideal for high humidity areas, also in places as small harbours where there's sea water. It is composed of a stainless aluminium profile on which our more resistant product has been applied.

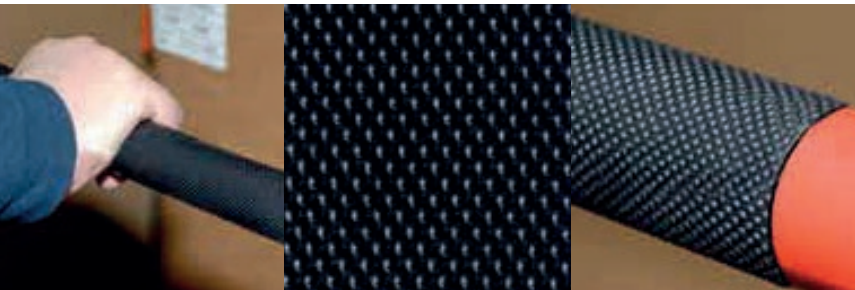

ANTI-SLIP SAFETY

Tearproof for soft grip

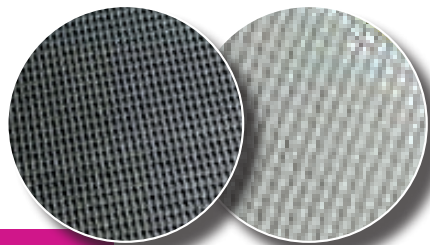

It's an anti-slip, very resistant and non-abrasive coating tape equipped with an effective and pleasant to touch surface. It is normally used also for coating industrial handrails, since it has a soft handle and allows a solid grip; when applied on shelves, it prevents from slipping any materials placed on them. 50 mm standard size, it is possible to tailor its width from 20 mm to 1350 mm. **It can be manufactured with or without adhesive.**
