CORRUGATED POLYPROPYLENE BOXES FOR DIFFERENTIATED WASTE COLLECTION

Differenzio is an ecological island with SEVEN **polypropylene** modular boxes to be installed in few seconds with extreme ease. The hexagon shape of these boxes allows to assemble this ecological island in order to be perfectly suitable for any space needs, while the different colours of modules give a better visibility to waste destination.

***Differenzio** allows us to introduce on the market an exclusive product thanks to its graphics, used by different consortia, public bodies, municipalities, companies and private individuals, that have appreciated its practicality and suitability over time. In addition to this, the new box Differenzio, made of corrugated polypropylene, is appreciated for its higher durability guaranteed by its excellent mechanical properties of bumps resistance, by its good chemical properties of resistance to water, grease, alcohol and some solvents. The new line of boxes designed for Differentiated Waste Collection is waterproof, lightweight, washable, easy to move, reusable and long-lasting, thanks also to its 3 mm thickness.*

MODULAR BOXES FOR URBAN AND DIFFERENTIATED WASTE COLLECTION

“UNIBOX” is a program with solid, sturdy and very spacious boxes designed in 3 different shapes. Made of AISI 304 stainless steel (316 on request) or of zinc coated and polyester powder painted sheet metal. Equipped with an internal trash bag holder, they are non-deformable and guaranteed for a long durability. Different colour paints on request.

U112 Connection with 2 cable ties

U116 With strike plate wall to the floor

U117 With concrete base

UNIBOX is the basic box to realize SIXBOX and PLURIBOX Ecological Islands.

Capacity: 80 L.

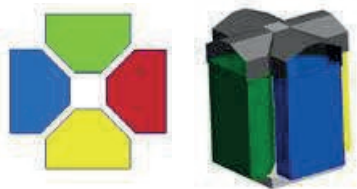

Sizes: 460L x 360D x 1100H

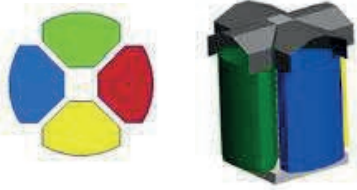

PLURIBOX is a modular system to be assembled in order to create small ecological islands. Starting from a single box called UNIBOX, it is possible to compose infinity linear or polyhedral shapes with many elements. Its versatility makes it ideal for small and big spaces. It is made of AISI 304 stainless steel or of zinc coated sheet metal that is painted in different colours in order to facilitate at a glance the differentiated waste collection. Each module can be opened only by means of the provided key . **SIXBOX** is a very practical and multifunctional box, very useful in all areas where there is a noticeable flow of pedestrian traffic. Its refined design allows to harmoniously place it in squares, schools, hospitals, airports, communities, train stations, expositions, etc. creating an unspoken invitation to use it to put inside of the same all those things that passers-by usually throw confusingly in a single box or even on the floor. SIXBOX is made of AISI 304 stainless steel or of zinc coated sheet metal that is painted in different colours in order to facilitate at a glance the differentiated waste collection. SIXBOX is very simple to install because it is a monoblock that can be managed with a davit crane and fixed with floor screws. SIXBOX is safe since it cannot be moved. Each module is hooked to the central structure and can be opened only by means of the provided key. This ecological island is composed of 4 modules and each of them has a 80 litres capacity. They can be customized with any colours or symbols and with 2 small internal boxes for the collection of low batteries and cigarettes.

MINI SMOKE POINT/ TO KEEP THE ENVIRONMENT CLEAN

TECHNICAL CHARACTERISTICS
Column diameter mm 139,7
Total height mm 600
Ashtray slot opening mm 145
Cigarette butts box mm 200
Capacity L 3

MINI SMOKE POINT is the ideal solution for places or conditions where installing the floor standing column ashtray is difficult or there isn't enough space. Same as the floor standing version, MINI SMOKE POINT is made of AISI 304 stainless steel with polished finish.

Code	Outdoor wall box for cigarette butts collection
DMR-MSP600LUC	Polished stainless steel column ashtray

SMOKE POINT is the ideal outdoor box for cigarette butts collection. A column ashtray conceived and designed to solve the annoying problem of cigarette butts pollution and to help public places managers to clean smoking rooms and all public places entrances.

SMOKE POINT is composed of a base and a vertical body. The cigarette butts collection takes place through an opening in the upper part equipped with a perforated grid on which it is possible to put out the cigarette before throwing it into the ashtray, whose conformation avoids other types of trash to be introduced into it.

We have paid particular attention to the design of this product: sober lines, modern and attractive design, simple and understandable graphics. SMOKE POINT is not only a simple cigarette ashtray, but also a real furnishing complement.

SMOKE POINT cigarette ashtray is equipped with an automatic detection mechanism for the cigarette butts section. When the column box is completely full, the red dot informs that it must be emptied. This operation is easy and fast, and must be carried out after a proper unlock, lifting the upper lid and removing the full box from above.

SMOKE POINT column is made of AISI 304 stainless steel with polished finish. Its base is made of steel and has two holes to be fixed on the ground.
