

Accuracy and easy to apply, durability, easy installation without stopping the productive chain are some characteristics of our horizontal adhesive signs.

ADVANTAGES OF OUR HORIZONTAL ADHESIVE SIGNS

- Fast installation
- It doesn't require any drying times
- Easy to apply and to remove
- It is not subjected to any chromatic alterations
- Customization possibilities
- It doesn't give off any “unpleasant” odors
- Reduction of labour costs
- It doesn't require any special disposal as for paint
- It can be stocked in warehouse

PEDESTRIAN CROSSINGS

OSHA (European Agency for safety and health at work) requires that pedestrian crossings are easy to see. Pedestrian crossing adhesive rolls are an ideal and economic solution for keeping pedestrians safe from moving machineries. Pedestrian crossing adhesive rolls are available in SUPREME and also in XTREME version on request. Available sizes are: 86cm x 30m and 86cm x 15m.

DMR GLOW

It is the ideal solution in order to communicate escape routes to workers during a dangerous situation or power cut. These are its characteristics: 10 cm width, 0,90 mm thickness, the printing on black tape that is available with both 2,5 cm phosphorescent strip, on which it is possible to write a customized message, and with 0,6 cm line. Extremely high resistance thanks to its rubber based adhesive with an integrated net, it has excellent resistance and durability also on uneven floors. This product has bevelled edges and an anti-slip surface, complying with the standards: DIN 67510 Class C, ASTM E2072-04,ASTM E2030-07.

* MINIMUM ORDER 3 ROLLS, OR AN ADDITIONAL COST OF 30 EUROS FOR ONE ROLL

WARNING AND DANGER BICOLOUR ROLL

It is designed to identify a danger zone or a risk area in order to keep it clear, for example, electrical panels that should be kept clear in case of emergency. It is also excellent on unstable floors. Easy to install and remove thanks to its adhesive back, it doesn't need any drying nor maintenance.

XTREME

XTREME has been designed and produced with a surface foil, in order to provide our signs an extreme resistance to forklifts rotation (where also concrete is usually damaged) and ease of cleaning, even for removing debris from forklifts wheels. **XTreme** has a rubber based adhesive with integrated net and bevelled edges. Possibility to reuse it.

ADVANTAGES AND BENEFITS

ULTRA RESISTANCE: Made using the same Ultra resistant material of bullet-resistant polycarbonate.

ULTRA REDUCED THICKNESS: With its just 0.6 mm thickness and bevelled edges withstands side impacts caused by forklift trucks and by collisions with pallets. It is perfect for marking AGV lanes and for high traffic applications.

ULTRA FLEXIBILITY: Size flexibility means that no application is too big or too small.

Possibility to manufacture it from 2,5 cm to 1m width, up to 30m length.

ULTRA HIGH RESOLUTION: High resolution printing and perfect image quality make this Ultra products the perfect choice for manufacturing industries and commercial activities.

NUMBERS, LETTERS, ARROWS, CORNERS, FOOTPRINTS AND PEDESTRIAN CROSSINGS

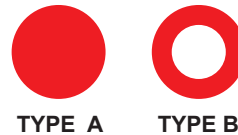

These PVC products are perfect for any 5 S, Six Sigma, W.C.M., O.S.H.A., TPM programmes and are available in a huge range of shapes, colours and sizes. This type of ultra-resistant adhesive for floors communicates safety instructions to workers in all industrial and commercial sectors. It withstands pedestrians and vehicles crossing, it's excellent even on unstable floors, easy to install and remove thanks to its adhesive back. It needs neither drying nor maintenance, but brings benefits concerning cost reduction.

Installation Step I. Preparation

Please note: as for any printed product and tape installation, it is essential that the floor is properly prepared, and as clean and dry as possible.

Remove completely old adhesive tape and/or chipped paint from floor surface.

To clean floor surfaces don't use a CHLORINE DETERGENT NOR CITRUS-BASED CLEANERS. Chlorine tends to leave a trail on the floor, making the adhesion of any adhesive difficult. Citrus-based cleaners may leave an oily residue inhibiting adhesion.

Use a degreaser on the floor, if necessary. Remove, wash the degreaser before applying adhesive signage.

Let floor surfaces dry completely and wait at least 30 minutes before applying the signage.

Once the floor has properly dried, it is possible to apply Signage Icons or Tapes where necessary.

Move forward for application phase

Installation Step II. Application

Please note: Adhesive signage is applied more efficiently and accurately by a two-person installation team.

Remove 30 cm protection tape from the end of the roll.

Align the strip in the same direction you want to apply it, and push firmly the adhesive tape facing the floor.

While an installer is pressing on the strip blocked on the floor, the second installer unrolls the strip to the desired length, staying away from the floor and keeping both pressure and alignment.

While the second installer is firmly pressing on the unrolled strip, the first installer works along the line, removing the wrap from the adhesive and firmly pressing the part of it facing the floor, as long as the desired length is fixed.

To finish a line, just cut the roll using scissors or a utility knife.

In order to create square corners, let the two pieces to superimpose onto each other, with the lower piece adhered to the floor and the upper one superimposed.

Complete this union cutting both layers together from the inner corner to the outer corner, and unwrap both strips. The resulting pieces of corners will be perfectly combined.

In order to increase the adhesion of the products to the floor, you can cross along the whole line with anything heavy, such as a forklift truck.

Please Note: floor surfaces having cracks or holes may reduce the product durability. In high traffic areas.

Cleaning:

If adhesive signage gets dirty, it can be cleaned using warm water and detergent, it doesn't withstand strong solvents but resists to acids and alkaline liquids.

Removal:

1. Add a little of "Citrus-based Cleaner" on a cloth and spread it on adhesive residue.
2. Remove the adhesive residue using a brush.
3. The dissolved residue can be easily scraped or removed with a dry cloth.
4. Wash the floor surface using soap and household detergent, to completely remove any remaining residues of "Citrus-based Cleaner" before applying again adhesive signage

ADHESIVE SIGNAGE CHARACTERISTICS, SIZES AND TYPES

LEGEND TO CODIFY SIGNS	code/size/type
Code/size = NITTO	Ex: 0856/46
Base code/size+ R = RUBBER	Ex: 0856/46R
Base code/size+ E = OUTDOOR	Ex: 0856/46E
Base code/size+ EM = OUTDOOR MAX	Ex: 0856/46EM
Base code/size+ CS = COLD STORAGE	Ex: 0856/46CS
Base code/size+ U = ULTRA	Ex: 0856/46U
Base code/size+ XT = EXTRA STRONG	Ex: 0856/46XT

NITTO this type is suitable for indoors, resistant to forklifts crossing.

RUBBER this type is suitable for indoors, reusable, resistant to forklifts crossing.

OUTDOOR this type is suitable for outdoors, on concrete surfaces and tiles, resistant to forklifts crossing.

OUTDOOR MAX this type is suitable for outdoors, on unstable grip surfaces, such as asphalt and porphyry, resistant to pedestrians and trucks crossing.

COLD STORAGE this type is suitable for indoors, resistant to low temperatures and forklifts crossing.

ULTRA this type is suitable for indoors, with rounded corners and is a new reusable product, the most resistant of our range.

EXTRA STRONG this type is suitable for indoors and outdoors, resistant to high traffic.

HOW TO GENERATE COVID-19 SIGNS CODE (see pages 20 and 21)

Ex: COV (covid acronym) + 30cm (size) + 001 (chosen graphics code) + outdoor (**E** = outdoor, see legend)

*This is the full code: **COV-30-001-E***

PHOTOLUMINESCENT SIGNAGE

SHAPE	SIZE
SQUARE	MAX 61x61cm
CIRCLE	MAX diam 61cm
RECTANGLE	29,7x42cm 41x61 cm

(PHO) Photoluminescent Line:
In the colours combination:
Black background/White photo part

We can manufacture all sizes included at most in 41 cm height

EX: 1155/3123PHO chosen sign code-size + PHO

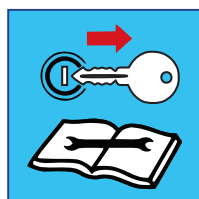

WE CAN MANUFACTURE ANY SIGN HAVING ULTRA PERFORMANCE ADHESIVE AND SUITABLE FOR ROUGH FLOORS

FLOOR MARKING SIGNAGE

Floor marking signage is highly visible and doesn't fade over time. It is ideal for any lean manufacturing programme, such as 5S or Six Sigma and WCM. Since it communicates safety instructions to operators, it withstands pedestrians and vehicles crossing. These signs are easy to install and reconfigure, with considerable saving in money and time. These are its characteristics: 0,90 mm thickness, adhesive back, possibility to customize in photoluminescent version. *It is possible to manufacture any type of custom sign with logo.*

SAFE DISTANCE KIT

REF. KIT 1 FOR OUTDOOR USE

WE RECOMMEND PVC 2020EM CODE
2,5 mm THICK.
DESIGNED FOR IRREGULAR SURFACES,
SUCH AS ASPHALT, CONCRETE, ETC..
This adhesive is composed of a special foam and
has a very good resistance.

1 KIT composed of:

5 pieces having 15 cm diameter + 5 strips 1 m x 5 cm. Made
of adhesive Pvc - composed of a rubber based adhesive with
integrated net for an excellent resistance. **CODE. 2020**

Ref. KIT 2 PLEASE NOTE: WITH 2020/RAD CODE

IT IS POSSIBLE TO REQUEST KIT 1 CHARACTERISTICS
WITH KIT 2 GRAPHICS (wait here)

2 KIT composed of:

5 pieces having 30 cm diameter + 5 strips 1 m x 10 cm. Made
of adhesive Pvc - extra-strong quality - anti-slip certified.

FIRE-FIGHTING SIGNS

STANDARD SIGNAGE OF PICTOGRAMS FROM P.18 TO P.23 CAN BE CUSTOMIZED WITH ANY GRAPHICS ON REQUEST.

According to 81/2008 Legislative Decree, in annex XXV, is specified that safety signs sizes must be such that the area A of the sign and maximum distance L, from which the sign has to be still visible, meet the following formula: $A \geq L^2/2000$.

CLEANER *Multi-purpose detergent and degreaser for the removal of horizontal signage residues .*

Our Cleaner is eco-friendly, not harmful and versatile. It is used to remove dirt residues on the floor before any application and to make our signage application long-lasting. It can be pure or diluted with water in different concentration, to degrease and clean industrial environments and business infrastructures. It is usable with industrial washers, pressure washers and steam cleaners. It is non-toxic, odourless, not flammable, water-based biodegradable. In order to achieve excellent results, you have to dilute it in warm water.

MANUTENZIONE E VARIE

DESCRIZIONE	VERNICIATURA	STRISCE DMR
Resistenza a rottura	Crepe nel pavimento determinano frammentazione della striscia	Adatte a pavimenti instabili
Durata	Graffi ed abrasioni comportano l'asportazione della vernice con conseguente perdita di visibilità e necessità di ripristino mediamente ogni 6 mesi	La colorazione incorporata nello spessore del materiale non comporta perdita di visibilità conseguente a graffi ed abrasioni. In caso di rottura è sufficiente rimuovere la parte di striscia danneggiata e sostituirla con una nuova
Riparabilità	Occorre riverniciare procedendo preventivamente alle operazioni di rimozione e smaltimento della parte danneggiata	In caso di rottura è sufficiente rimuovere la parte di striscia danneggiata e sostituirla con una nuova
Personalizzazione	Previo realizzazione ed uso di maschere di verniciatura	Le strisce sono personalizzabili con qualunque scritta in fase di produzione
Stoccaggio	I prodotti usati devono essere stoccati in appositi armadi antincendio inaccessibili ai non addetti ai lavori	Non necessitano di particolari cautele
Pulizia	Normali pulitrici	Normali pulitrici
Fattibilità	Variabile in funzione dell'organizzazione aziendale	Immediata

NOTE DI RILIEVO

- (1) Per la verniciatura occorrono minimo due persone
- (2) La verniciatura deve essere eseguita nel fine settimana e nei fermi produttivi
- (3) Il costo del nastro dmr e' dato dalla media delle qualita' mean lean e supreme da 7,5cm
- (4) Per rimuovere la verniciatura e' possibile farlo anche con il sabbiatore ad un costo medio di 15,00 €/mt
- (5) Con la verniciatura abbiamo diverso materiale da smaltire
