

A person wearing a dark suit and white shirt is shown from the chest down. Their hands are glowing with a bright yellow light, making them stand out against the dark background. The hands are positioned in front of the person, with the right hand slightly higher than the left. A large, semi-transparent yellow rectangle is overlaid on the right side of the image, partially covering the glowing hand.

**PHOTOLUMINESCENT  
PRODUCTS**

**DMR**

SRL

## ENVIRONMENTAL PROTECTION:

Our products are more fluorescent in the dark, and our production is certified according to ISO 9001 and ISO 14001 Standards, that ensure respect for all environmental criteria.

**REACH:** products satisfy the REACH criteria and do not contain **SVHC** (substances of very high concern). We use recycled materials (like aluminium). In addition, any additional power supply is not required for the functioning of products. Thanks to our membership to PSPA (Photoluminescent Safety Products Association) we have intensified the use of photoluminescent products on land, at sea and in the air for several years, researching and obtaining the cooperation with other international manufacturers.

## USE OF PRODUCTS

Labelling requirements: the products line provides different qualities with various light intensity and basic materials using new-generation fluorescent pigments. Luminance products are designed for indoors (exception: aluminium assembly point). Please ask separately for further information about outdoor durability. Each product quality can be recognized by the first two numbers of the identification "Code".

### 15. HI 150 Alu

HI150 Aluminium, depending on the product with 0,2 mm or o 0,56 mm thickness, with photoluminescent coating. C luminescence class.

### 17. HI 300 Alu

HI300 Aluminium, depending on the product with 0,2 mm or o 0,56 mm thickness, with photoluminescent coating. D luminescence class.

### 38. HI 150 Film Products

(Not for walkable surfaces! Not suitable for printing). For example, 0,1 mm high quality self-adhesive film, with photoluminescent coating. C luminescence class.

### 51. AluMetals

Non-fading and weather-resistant aluminium with 0,56 mm thickness.

### 60. Acrylic film with photoluminescent coating

With extremely high luminous intensity. Not for walkable surfaces! Not suitable for priting.

### TLxx. Triple loading performances

Through a special pigmentation, "Triple Loading" products load three times faster than normal products. TL products are very suitable to be used with LED lights.

### Cxx

These products are fluorescent during the day and photoluminescent at night, that's why they are perfectly suitable for marking dangerous areas that must be visible during day and night.

## LIGHT ENGINEERING PARAMETERS

Luminous flux  $\Phi_v = 12.566$

Luminescence classes classification according to ISO 17398

Luminescence	after 10 minutes	after 60 minutes	duration
HI 150 (Class C)	150mcd/m <sup>2</sup>	22mcd/m <sup>2</sup>	2100 min.
HI 300 (Class D)	300mcd/m <sup>2</sup>	45mcd/m <sup>2</sup>	4100 min.
HI 450 (Class D)	450mcd/m <sup>2</sup>	70mcd/m <sup>2</sup>	4500 min.
HI 600 (Class E)	600mcd/m <sup>2</sup>	100mcd/m <sup>2</sup>	8100 min.

The figure to the left shows the connection among different photometric parameters that are always used to describe photoluminescent products. In this respect, the luminous flux that hits the product surface is important for luminescence loading. Luminous flux per unit area is indicated in "lux" (Luminous flux). The visibility of an object depends mainly on surface luminance measured in cd / m<sup>2</sup>. The higher this value is, the more luminous the object is, and as a consequence, the visibility will be better. Photoluminescent products loading also depends on the colour temperature of the light source (the higher it is, the better the loading will be), on the spectral distribution of the light source (blue component as high as possible), time, type of pigment, radiation angle of the light source (especially for LED).

Luminous flux = 12.566 lm - Luminous intensity  $I = 12.566 \text{ lm} / 4 \text{ sr} = 1 \text{ cd}$

Illuminance  $E = 1 \text{ lm} / \text{m}^2 = 1 \text{ lx}$  - Luminance  $L = 1 \text{ cd} / \text{m}^2$

THE BEST SERVICE

- Individual and expert advice - no waiting time
- Luminescence that complies with legal requirements
- Variety of products
- Product development
- Thanks to a dense net of commercial partners, we are there for you
- Products in stock = shipping on the same day
- Request management in a working day
- Special designs on customer's request
- All products comply with "REACH" and "RohS" requirements.
- Prompt implementation of new directives

**In case of emergency, every second is important**

During emergencies, people evacuation is the primary object. There are different standards (technical rules) with regard to design of photoluminescent safety guidance systems, which are included in planning and installation. Especially, DIN 67510 rule part 3 describes German advanced technology concerning safety guidance systems. Internationally, "ISO 16069" standard specifies safety guidance systems. With the purpose of evaluating products related to their suitability to illumination, ISO 17398 rule also requires to manufacturer to provide further information about luminescence for specific scenarios:

- a) Test with D65 standard illumination for 20 minutes at 200 LUX;**

**b) Test with fluorescent lamp (4,300 K) for 15 minutes at 50 LUX;**
- c) Test with fluorescent lamp (3,000 K) for 15 minutes at 25 LUX;**

**d) Test with LED (6000 K) for 15 minutes at 50 LUX;**

**values for scenario "a"**

*\* In almost all buildings, today illumination is available with LED technology. That's why it is important to understand how LED equipment complies with photoluminescent products loading. LED cannot easily be standardized as fluorescent lamps. As a general rule, loading efficiency increases with colour temperature of light. Products are especially suitable for LED illumination (please refer to scenario "d").*

*Make sure you have sufficient luminous intensity (measured with an appropriate lux meter) and a proper illumination of the product (angle of impact).*

*If you have further questions, you just need to contact our experts.*

## PROFILES CHARACTERISTICS

For “near-ground” safety systems concerning ISO 16069 and IMO

Easy installation: by means of screws, rivets and/or incomplete gluing, it helps to optimize installation time.  
Well-shaped end caps ensure a clean finish.

### COMPONENTS:

#### BASIC BASE

For “Flex 1” guidance strips 37 mm height  
Material: aluminium  
Height: 41,5 mm, Length: 3000 mm  
Code DMR90.7754

#### COATING PLATE

Material: photoluminescent plastic  
Code DMR90.7757

#### “FLEX 1” RIGID GUIDANCE STRIPS

Material: HI300 Aluminium, with self-adhesive ceramic coating  
Height: 37mm, Length: 1m, Strength: 0,2 mm  
Neutral without paint Code **DMR17.7730**  
right “EXIT” text Code **DMR17.7755**  
left “EXIT” text Code **DMR17.7756**

#### DIRECTIONAL GUIDANCE FOR FLAT PROFILE

1 Serie = 10 pcs  
Material: TL 300 Aluminium, with self-adhesive ceramic coating  
Height: 37 mm, Width: 37 mm, Profile: 0,2 mm

Right escape route E001	Code	<b>DMR17.7751</b>
Left escape route E002	Code	<b>DMR17.7752</b>
Right/left arrow	Code	<b>DMR17.7753</b>

## SAFETY GUIDANCE SYSTEMS PROFILES

**ProFIL 50 with optimized load Advantage:** according to a revised national legislation, the strip width can be significantly reduced. With a 50 mm reduction this width allows a more comfortable integration in the design of your building. A well-designed profile angle ensures an optimized load.

Easy installation: screws, rivets and incomplete gluing fixation (hidden) allows fast installation time. Well-designed coating plates provide a “clear” edge.

### COMPONENTS:

#### PROFIL 50 BASIC PROFILE (angular)

Connector for “FLEX 1” guidance strip, 5 cm height  
Material: Anodized aluminium, Silver  
Height: 5,4 cm, Length: 3 m  
Code **DMR90.7732**  
(other length sizes are available with an additional cost)

#### PROFIL 50 COATING PLATE (linear)

Material: plastic  
Right Code **DMR90.7733**  
Left Code **DMR90.7734**

#### DIRECTIONAL MARKING (angular)

Adhesion to the upper part of the profile  
1 serie = 10 pcs  
Material: Photoluminescent aluminium with self-adhesive ceramic coating  
Height: 50 mm, Width: 50 mm, Profile: 0,2 mm  
Two different qualities:

Right emergency exit	HI300	Code <b>DMR17.7697</b>
	TL300	Code <b>DMRTL17.7697</b>
Left emergency exit	HL300	Code <b>DMR17.7698</b>
	TL300	Code <b>DMRTL17.7698</b>
Right/left arrow	HI300	Code <b>DMR17.7699</b>
	TL300	Code <b>DMRTL17.7699</b>

#### “FLEX 1” PROFIL 50 RIGID GUIDANCE STRIPS (angular)

Material: HI 300 Aluminium/ TL 300 Aluminium, photoluminescent with self-adhesive ceramic coating  
Height: 5 mm, Length: 1 m, Profile: 0,2 mm

Two different qualities:

HI300 Code **DMR17.7696**  
TL300 Code **DMRTL17.7696**

TAPES

For a guidance system near to floor in different configurations for individual use. Closure on the wall up to 40 cm from the floor. Also available in “C” quality. Orientation markings (0,56 mm aluminium photoluminescent coating, to be screwed). A self-adhesive version is also available on request.

Guidance tape 0,56 mm Aluminium

HI (0,56 mm Aluminium photoluminescent coating, to be screwed). A self-adhesive version is also available on request.

FLOOR AND WALL GUIDANCE MARKING

According to regulations, photoluminescent safety guidance systems marking must have a 5 cm minimum width. However, minimum width of strips can be reduced to 2,5 cm if luminance achieves at least the following values: 100 mcd / m² after 10 minutes and 15 mcd / m² after 60 minutes.

Fire exit signs

Fire exit signs (green/transparent, self-adhesive, non-photoluminescent).

Description	Width	Code
Right fire exit	L x H 5,0X10,0 cm	DMR90.4973R
Right fire exit	L x H 10,0X20,0 cm	DMR90.4975R
Left fire exit	L x H 5,0X10,0 cm	DMR90.4973L
Left fire exit	L x H 10,0X20,0 cm	DMR90.4975L

“Flex 1” guidance tape

Universal use. Aluminium, 0,2 mm thickness, photoluminescent coating, with ceramic surface finish, self-adhesive and anti-slip tape.

Description	Width	Code
HI 300	L x L 2,5X100 cm	DMR17.7656
HI 300	L x L 3,7X100 cm	DMR17.7730
TL 300	L x L 3,7X100 cm	DMRTL17.7730
HI 300	L x L 5,0X100 cm	DMR17.7696
TL 300	L x L 5,0X100 cm	DMRTL17.7696

**Safe tread.** According to codes and international standard, stairs, handrails and ramps indicating fire exits must be marked so that the beginning, the centre and the end of fire exits are clearly recognizable.

### **HI 450 Stair profiles Photoluminescent sections for modernization.**

These profiles can be used for modernizing stairs made of natural stone, wood and other materials. They are suitable to be installed on finished stairs and as a coating to repair treads edges, as well as for covering and to avoid small fires. The extremely strong photoluminescent section is protected by segments among grooves.

*Each groove has a luminescence of about 700 mcd / m<sup>2</sup> after 10 minutes, which produces a luminescence for the whole surface (measured on 4 grooves) of about 450 mcd / m<sup>2</sup>.*

Drill holes in the back reception channel. Other colours and length sizes are available on request.

#### **HI 450 Stair profiles**

Material: HI 450 Aluminium

Colour: Grey

Width: 3,5 cm, Length: 100 cm, Height: 0,3 cm Code: **DMR90.020007D**

Material: HI 450 Aluminium

Colour: Black

Width: 6 cm, Length: 100 cm, Height: 2,3 cm Code: **DMR90.020004D**

Material: HI 450 Aluminium

Colour: Silver

Width: 6 cm, Length: 100 cm, Height: 2,3 cm Code: **DMR90.020005D**

Material: HI 450 Aluminium

Colour: Grey with "R11" anti-slip strip

Width: 5,2 cm, Length: 100 cm, Height: 2,0 cm Code: **DMR90.020009D**

**BRAND  
NEW**

#### **Plastic Stair profile**

Material: Plastic

Width: 5,7 cm, Length: 100 cm, Code: **DMR90.0400016ATS**

#### **A special advantage:**

Depending on local conditions and on light exposure quality, it is possible to select different luminous qualities corresponding to the aluminium strip profile.

As default setting, this profile is delivered with a Class "D" luminescence strip.

# STAIRS MARKING

**U-Profile** is a new product for safety optical guidance systems! It's ideal to be used on stairs, including floor coatings and (where applicable) as an expansion area. This profile is made of aluminium and filled with a special photoluminescent resin. Luminance measures 450/70 mcd / m2 in compliance with DIN67510 standard and provides a meaningful contrast with the rest of the floor. Light absorption during the day provides visibility at sunset and at night.

## U- PROFILE

Material: HI 450 Aluminium  
Width: 1 cm, Length: 100 cm, Height 0,6 cm

Code **DM90.02001 1D**

## NEUTRAL STAIR MARKING

Material: HI 300 Aluminium, 0,56 mm  
90 degrees angle, self-adhesive, ceramic coating.

Width: 5 cm, Length: 20 cm, Height 4,5 cm

Code **DMR17.7490**

## STAIR MARKING WITH ARROW

Material: HI 300 Aluminium, 0,56 mm  
90 degrees angle, self-adhesive, ceramic coating  
Width: 4 cm, Length: 18 cm, Height 3 cm

High arrow

Code **DMR17.US7490U**

Low arrow

Code **DMR17.US7490D**

*Abrasion-resistant design thanks to its high brightness. Simple assembly.  
Guidance marking on floor is considered continuous if at least three markings per metre are installed at regular distances. Signs should have a minimum diameter or a length of about 5 cm from the edge.*

**“Star 1” directional strips**

“Star 1” rigid guidance strips with HI Aluminium groove, 1,5 mm thickness, with photoluminescent and ceramic coating. In addition, it is equipped with 2 slots and a hole for a simple and fast assembly.

Width: 5 cm, Length: 22 cm	Code	DMR15.7497
Width: 5 cm, Length: 50 cm	Code	DMR15.7496
Width: 5 cm, Length: 100 cm	Code	DMR15.7495

**“Star 1” directional strips with two green arrows**

HI 300 Aluminium, 1,5 mm thickness, with photoluminescent ceramic coating. Equipped with 2 slots and a hole for a simple and fast assembly.

Width: 5 cm, Length: 100 cm	Code	DMR17.7498
-----------------------------	------	------------

**Disks**

HI 300 Aluminium, 1,5 mm thickness, with included hole.  
This item is especially suitable for permanent mounting on gratings.  
1 Package = 10 Pieces

Fully luminous: 10 cm	Code	DMR17.G7401
with directional arrow: 10cm	Code	DMR17.G7470

**Connections**

With bolts 1 Package = 25 Pieces	Code	DMR91.2003
----------------------------------	------	------------

**Disk with direction indicator (sublimation printing)**

Material: 1 mm Aluminium  
Extremely resistant to any abrasion and chemical treatment. Luminescence of 700 mcd/m2 after 10 minutes, 1 Unit = 10 disks

Diameter 10 cm	Code	DMR90.020013E
----------------	------	---------------

**Escape route floor marking**

Material: Film, 40x40 cm  
Floor marking systems according to ISO 16069. Escape route international symbols with arrow, special quality of film with anti-slip laminate: R10

A) Left escape route	Code	DMR90.4966
B) Right escape route	Code	DMR90.6947
C) Arrow	Code	DMR90.4968
D) Escape route and arrow 20x10 cm	Code	DMR90.4969

ADHESIVE FLOOR MARKING

MATERIAL: HI 300 ALUMINIUM, 0,2 MM

Arrows for floor marking/disks with green/photoluminescent self-adhesive directional arrows with anti-slip effect, long-term high adhesion. (3M special adhesion); 1 serie = 10 pieces

With green/photoluminescent arrow:

Diameter: 9,5 cm                      Code    DMR17.7470  
Diameter: 12,5 cm                  Code    DMR17.7471

Fully photoluminescent:  
Diameter: 5,0 cm                    Code    DMR17.7400  
Diameter: 9,5 cm                    Code    DMR17.7401

Floor marking (Rectangular)

Material: HI 300 Aluminium, 0,2 mm  
green/photoluminescent self-adhesive directional arrow,  
long-term high adhesion (3M special adhesion), anti-slip  
effect; 1 serie = 10 pieces

Length: 17,5 cm                      Code    DMR17.7473  
Width: 11 cm

Carpet Way Dot

Material: ABS Plastic, HI 300  
“Carpet Way Dot TM” mat markings allow a fast and simple method to mark the  
escape route in ares covered by mats. Normal aspiration or wet cleaning don't damage  
markings. Support materials are composed of plastic - markings have 0,2 mm  
aluminium bases for flat moquette, that is cut and woven on request.  
1 Serie = 10 pieces

With arrow: 5 cm diameter                      Code    DMR17.US1723  
One colour: 5 cm diameter                      Code    DMR17.US7400

Footprint

Material: HI 300 Aluminium, 0,2 mm  
Sizes: 21 cm x 8,5 cm  
Photoluminescent self-adhesive footprint with anti-slip effect.

Right footprint                      Code    DMR17.7654  
Left footprint                        Code    DMR17.7655

Lumipro® Soil nail with reflector

Height 1,1 cm, max compression 10 T, class E, 1400 mcd/m² photoluminescent.

Material: ABS Plastic and Resin  
Round: 10,2 cm diameter, 2 cm height,  
max compression 10 T                      Code    DMR90.020001E

Square: 10,2 x 10,2 cm, height 2 cm,  
max compression 16 T                      Code    DMR90.020003E

*Easy installation. Permanent safety. It marks doors and door handles that lead to the emergency exit.*

## Door handle sign

Material: HI 150/TL 300 Aluminium, 0,2 mm green/photoluminescent, self-adhesive

### a) For handle (left)

Width: 10 cm, Length: 25,5 cm

HI 150      Code **DMR15.7535**

Width: 10 cm, Length: 25,5 cm

TL 300      Code **DMRTL17.7535**

### b) For handle (right)

Width: 10 cm, Length: 25,5 cm

HI 150      Code **DMR15.7540**

Width: 10 cm, Length: 25,5 cm

TL 300      Code **DMRTL17.7540**

A

B

## Cylinder keyhole outline - Small product - Great effect

Material: PVC, laminate PET, 1 package = 3 Series of "photoluminescent cylinder keyhole outline" and "photoluminescent keyhole adhesive", all in one product! High brightness (200 mcd/m<sup>2</sup> after 10 minutes); suitable for cylinder keyholes standard profile.

Photoluminescent keyhole adhesive

Code **DMR90.020012C**

## "Door marking" Roll

Material: HI 150 Film photoluminescent/white, self-adhesive

Width: 3 cm, Length: 12 cm

Code **DMR38.7450**

Width: 6 cm, Length: 25 cm

Code **DMR38.7451**

Width: 3 cm, Length: 12 cm

Code **DMR38.7452**

Width: 3 cm, Length: 25 cm

Code **DMR38.7453**

## "Door marking" Adhesives

Material: HI 150 Film - Diameter 10 cm, photoluminescent, white and self-adhesive. It's a useful addition to photoluminescent guidance systems. In case of fire, they help for a fast orientation.

Text "Push"

Code **DMR38.7450**

Text "Pull"

Code **DMR38.4961**

## Front/back side for glass doors:

Text "Push/Pull"

Code **DMR38.4962**

Other languages are available on request

## OTHER ADHESIVE MARKING PRODUCTS

### Phosphorescent background

Materials: HI 150/HI 700 Aluminium, HI 150 Film  
Aluminium layer phosphorescent self-adhesive film. Bottom plate to be used, for example, behind safety equipment, such as: shut-off valves, safety ventilation, emergency stop switch, not suitable for screen printing.

Width: 62 cm, Length: 42 cm	HI150 Alu	Code DMR15.7521
Width: 84,1 cm, Length: 59,4 cm	HI150 Alu	Code DMR15.4979
Width: 62 cm, Length: 42 cm	HI150 Film	Code DMR38.7520
Width: 84,1 cm, Length: 59,4 cm	HI150 Film	Code DMR38.4979
Width: 100 cm, Length: 60 cm	HI700 Alu	Code DMR90.020006E

### Phosphorescent background for fire extinguishers

Lighting with a phosphorescent background for fire extinguishers. Aluminium, 0,2 mm or 0,56 mm thickness, with high photoluminescence coating. With progressive light intensity that varies from 55 mcd/m2 up to 150 mcd/m2 after 10 minutes.

Width: 39,5 cm, Length: 59 cm	Code DMR16.7525
Width: 50 cm, Length: 80 cm	Code DMR16.7526
Width: 58,5 cm, Length: 115 cm	Code DMR16.7527

### Arrow / marking point in sheets

Material: TL 150 Film  
Phosphorescent and self-adhesive. Ideal, for example, to mark switches.

Short serie, diameter 1,6 cm, 40 pieces/sheet	Code DMRTL38.7460
Short serie, diameter 2,5 cm, 15 pieces/sheet	Code DMRTL38.7461

#### Thin arrow serie:

Width: 1,8 cm, Height: 2,7 cm 20 pieces/sheet	Code DMRTL38.7462
---	-------------------

#### Large arrow serie:

Width: 1,8 cm, Height: 2,7 cm 20 pieces/sheet	Code DMRTL38.7463
---	-------------------

## ADHESIVE SAFETY GUIDANCE SYSTEMS

### Protection profiles

High quality protection profiles, anti-aging polyurethane foam for obstacles protection and identification, Photoluminescence class "C". Resistant to temperatures from -40 ° C to + 100 ° C, self-adhesive (high adhesion acrylic adhesive). Applications: inner and outer areas on machines, vehicles, inventory, warehouse and workshop equipment, decorated walls, beams and much more. Length: 1,00 m each one.

#### Profile 1 Semi-circular

Material: Polyurethane foam  
Colours: photoluminescent/black  
It is suitable to be mounted on flat surfaces on walls and shelves.  
**Width: 4 cm, Height: 3,2 cm**  
**Base (flat) - Width 3,5 cm**  
**CODE DMR90.9336**

#### Profile 2 Angular

Material: Polyurethane foam  
Colours: photoluminescent/black  
Self-adhesive, mounting on corners.  
**Width: 4 cm, Height: 4 cm**  
**Carving - 2,5 x 2,5 cm**  
**CODE DMR90.9337**

#### Profile 3 Circular with carving

Material: Polyurethane foam  
Colours: photoluminescent/black  
not self-adhesive, to be fixed  
**Width: 4 cm, Height: 4 cm**  
**"U-shaped" carving: Depth 2 cm, Width 0,8 cm**  
**CODE DMR90.9338**

## Roll marking also ideal to be used on handrails

### Acrylic compound film

Material: acrylic compound, Class "C", self-adhesive, non-walkable, tamper-resistant. Acrylic compound film. Ideal for a permanent marking.

Phosphorescent coating.

Width: 2,5 cm, Length 25 mm Code **DMR60.US7401**

Width: 5 cm, Length 25 mm Code **DMR60.US7403**

Width: 10 cm, Length 25 mm Code **DMR60.US4986**

### Acrylic compound film with laminate surface

Material: acrylic compound, Class "C".

Ideal for permanent marking.

Phosphorescent coating.

Walkable on foot and by light vehicles.

Width: 5 cm, Length 25 mm Code **DMR60.US7403L**

### Acrylic compound film on magnetic roll

Material: acrylic compound, Class "C".

Ideal for temporary marking.

Phosphorescent coating.

Non-walkable.

Width: 2,5 cm, Length 5 mm Code **DMR60.US7401M**

## Safety guidance systems / Tapes for marking

### "SafetyWalk" anti-slip tape

"SafetyWalk" self-adhesive, photoluminescence quality "C", fully fluorescent/black, "R11" anti-slip surface.

Width: 3 cm, Length 80 mm fluorescent

Code **DMR15.7501**

Width: 5 cm, Length 80 mm fluorescent

Code **DMR15.7504**

Width: 3 cm, Length 80 mm fluorescent/black

Code **DMR17.7507**

Width: 5 cm, Length 80 mm fluorescent/black

Code **DMR15.7510**

### Tape / green/photoluminescent directional arrows

Material: HI 150 Aluminium, 0.2 mm, self-adhesive

Width: 3 cm, Length 1 mm

Code **DMR15.7391**

Width: 6 cm, Length 1 mm

Code **DMR15.7392**

### Photoluminescent/black directional tape

Material: HI 150 Aluminium, 0.2 mm, self-adhesive Arrows: photoluminescent/black

Width: 1,5 cm, Length 1 mm right  
left

Code **DMR15.7372**

Code **DMR15.7373**

Width: 3,0 cm, Length 1 mm right  
left

Code **DMR15.7374**

Code **DMR15.7375**

Width: 6,0 cm, Length 1 mm right  
left

Code **DMR15.7376**

Code **DMR15.7377**

### Photoluminescent/red directional tape

Material: HI 150 Aluminium, 0.2 mm, self-adhesive Arrows: photoluminescent/red

Width: 1,5 cm, Length 1 mm right  
left

Code **DMR15.7381**

Code **DMR15.7382**

Width: 3,0 cm, Length 1 mm right  
left

Code **DMR15.7383**

Code **DMR15.7384**

Width: 6,0 cm, Length 1 mm right  
left

Code **DMR15.7385**

Code **DMR15.7386**

ADHESIVE SAFETY GUIDANCE SYSTEMS / TAPES FOR MARKING

C 150

“C” means Colour and 150 corresponds to proven quality “HI 150” which is 150 mcd/m² after 10 minutes, with a 35 hours decay time. **“C” products combine signs colours + visibility in the dark.**

Warning profile - C

Material: C150 Aluminium, 0,56 mm.  
“Warning Profile” has a 90 degrees angle, 3 cm marking on each side, included ceramic coating.  
It is especially suitable to mark edges, corners and obstacles.  
Colour: fluorescent light / faded black.

Width: 7,5 cm, Length 1 mm **Code DMRC15.7370**

Marking tapes - C

Material: C150 Aluminium, 0,2 mm  
fluorescent light / faded black visible during day and night.

Width: 5,0 cm, Length 1 mm **Code DMRC15.4994**  
Width: 7,5 cm, Length 1 mm **Code DMRC15.4995**  
Width: 10 cm, Length 1 mm **Code DMRC15.4996**

“SafetyWalk” anti-slip tape

Material: C150 Aluminium, 0,2 mm - SafetyWalk anti-slip and self-adhesive tape, “C” photoluminescence quality, fully fluorescent, fluorescent/faded black. “R11” anti-slip surface.

Fully fluorescent Width: 3,0 cm, Length 80 cm **Code DMRC15.7501**  
Fully fluorescent Width: 5,0 cm, Length 80 cm **Code DMRC15.7504**  
Faded black Width: 3,0 cm, Length 80 cm **Code DMRC15.7507**  
Faded black Width: 5,0 cm, Length 80 cm **Code DMRC15.7510**

Warning rolls - C

Material: C 150 PVC film, self-adhesive, “C” photoluminescence quality, fully fluorescent, fluorescent/faded black. Non-walkable.

Left faded black Width: 5,0 cm, Length 10 m **Code DMRC38.4987**  
Right faded black Width: 5,0 cm, Length 25 m **Code DMRC38.4990L**  
Faded black Width: 3,0 cm, Length 80 m **Code DMRC15.7507**  
Width: 5,0 cm, Length 25 m **Code DMRC38.4990R**

Triangle warning sign - C

Material: C150 Aluminium or C150 Film. Phosphorescent and fluorescent white. We also manufacture your customized warning sign!

Width: 20 cm C150 Aluminium **Code DMR15.0252**  
Width: 20 cm C150 Film **Code DMR38.0252**

**Black Warning tape**

Material: HI 150 Film  
Phosphorescent/black, self-adhesive

Right Width: 3 cm, Length 25 m  
Left Width: 3 cm, Length 25 m  
Right Width: 6 cm, Length 25 m  
Left Width: 6 cm, Length 25 m

Code DMR38.7408  
Code DMR38.7409  
Code DMR38.7414  
Code DMR38.7415

**Red Warning tape**

Material: HI 150 Film  
Phosphorescent/red, self-adhesive

Right Width: 3 cm, Length 25 m  
Left Width: 3 cm, Length 25 m  
Right Width: 6 cm, Length 25 m  
Left Width: 6 cm, Length 25 m

Code DMR38.7428  
Code DMR38.7429  
Code DMR38.7434  
Code DMR38.7435

**Marking tape/escape route indicator**

Material: HI 150 Film  
Green/phosphorescent, self-adhesive

Right Width: 4 cm, Length 20 m  
Left Width: 4 cm, Length 20 m

Code DMR38.7458  
Code DMR38.7459

**Marking tape with direction indicators**

Material: HI 150 Film  
Green/phosphorescent, self-adhesive

Width: 3 cm, Length 25 m  
Width: 6 cm, Length 25 m

Code DMR38.7441  
Code DMR38.7443

High quality manufacturing

On request: Framed markings, other shapes and sizes and also an acrylic glass frontal covering.

## Our recommendation

**Marking safety places always according to latest standards and directives in order to satisfy legal requirements. Use always the same signage inside the same place like a marking, because using different symbols for a safety plan may cause some confusion and disorientation with unpredictable consequences.**

## Concerning ISO 7010

+ DIN 67510 + Luminescence Class "C" + also available in larger sizes

60 x 60 cm Code DMR15.A2015

APPLICATION EXAMPLES

FIRST AID ADHESIVE SIGNS

Our recommendation

First aid structures and first aid equipment should be marked as such. Necessary rescue signs made of photoluminescent material (for example, photoluminescent emergency signs) must be used on escape routes, unless there is an available emergency lighting in the workplace. Anyway, the safety objective must be to guarantee that rescue signs can be recognized in case of a general lighting failure.

Film signs	Aluminium signs
size	size

UL 924 REGULATION FOR EMERGENCY LIGHTING AND EXIT

Luminance Class “C” or “E”

UL 924 enumerates “EXIT” signs; visibility up to 22 m. Signs “EXIT” are equipped with 2 adhesive direction indicators for directional indication.

**Green EXIT sign**  
Class E \* luminance  
aluminium 35.7 x 21.7 cm  
Code DMR90.8924G

**Red EXIT sign**  
Class E \* luminance  
aluminium 35.7 x 21.7 cm  
Code DMR90.8924R

**Black EXIT sign**  
Class E \* luminance  
aluminium 35.7 x 21.7 cm  
Code DMR90.8924B

**Adhesive pads**  
Indispensable for an easy and safe installation of our aluminium signs.  
1 serie = 4 pads  
Code DMR90.9129

**Adhesive pads**  
Extremely strong adhesion for an easy and safe installation of our aluminium signs.

## ADHESIVE SIGNS FOR OPERATIONAL GUIDELINES

### Exit

Film 30 x 10,5 cm Code DMR38.0126  
Alu 30 x 10,5 cm Code DMR15.0126  
40 x 14 cm Code DMR15.0127

40 x 14 cm Code DMR15.0106

### Handicapped exit to the right

Alu 20 x 20 cm Code 15.A2065

### Handicapped exit to the left

Alu 20 x 20 cm Code 15.A2070

*\* Signs will be equipped with 2 adhesive direction indicators*

### Home alarm

Film 15 x 15 cm Code 38.A5200  
Alu 15 x 15 cm Code 15.A5201

## ADHESIVE ESCAPE SIGNS

### Emergency exit with evacuation stairs, to the left

ISO 7010-E016 to the left  
Finish: printed or laminated

Film 20 x 20 cm Code DMR38.3020  
Alu 20 x 20 cm Code DMR15.3020

### Emergency exit with evacuation stairs, to the right

ISO 7010-E016 to the right  
Finish: printed or laminated

Film 20 x 20 cm Code DMR38.3021  
Alu 20 x 20 cm Code DMR15.3021

### Fire exit

DIN 4844-2 DE019

Finish: printed or laminated

Film 15 x 15 cm Code DMR38.A2030  
20 x 20 cm Code DMR38.A2035  
Alu 20 x 20 cm Code DMR15.A2035

### Fire exit with acces to fire ladder

ISO 7010-E017

Film 20 x 20 cm Code DMR38.0037-2  
Alu 20 x 20 cm Code DMR15.0037-2

### Turn clockwise to open

ISO 7010-E019

Film 10 x 10 cm Code DMR38.A2055

### Turn anti-clockwise to open

ISO 7010-E018

Film 10 x 10 cm Code DMR38.A2050

ADHESIVE MARKING FOR TOPS AND SECTIONS

This is an excellent complement for path signage for doors and stairs.  
\*please provide 6-digit order number, as well as the desired number/s or letter/s.

Numbers- letters  
Film 15 x 15 cm Code DMR38.3022\*  
Alu 15 x 15 cm Code DMR15.3022\*

Film signs	Aluminium signs
size	size
15 x 15 cm	15 x 15 cm
20 x 20 cm	20 x 20 cm
30 x 10,5 cm	30 x 10,5 cm
	40 x 14 cm

 For example: **DMR38.3022-1** or **DMR38.3002-A**  
Finish: screen or digital print, optionally laminated.

ADHESIVE FIRE-FIGHTING SIGNS

**Excellent visibility**  
Fire-fighting safety signage that is required for escape routes must be photoluminescent, because safety lighting is not always present in the workplace. This guarantees an excellent visibility of fire-fighting safety signs if general lighting doesn't work.  
**Our recommendation:** Mark always safety places according to the latest standards and directives to satisfy legal requirements. Use always the same signage inside the same place like a marking, because using different symbols for a safety plan may cause some confusion and disorientation with unpredictable consequences.

**Fire extinguisher**

## TRIPLE LOADING ADHESIVE PHOTOLUMINESCENT SIGNS

Triple loading, ideal for areas where lighting is poor or with short light periods. This is to be preferred for activation through LED. For the highest planning security for a 300 mcd/m<sup>2</sup> luminance after 10 minutes and 45 mcd/m<sup>2</sup> after 60 minutes. More visibility = More safety. We have been using successfully TL quality for years in the design. A new generation of innovative pigments combined with the high luminance of our HI 300 products generates a loading time up to three times faster. Therefore, TL 300 products are ideal for areas where lighting is poor or with short activation periods (for example, tunnels, stairs, underground parking lots and areas with time switch). On our customers request, we also provide markings for escape routes and fire-fighting equipment signs with this "Premium" quality.

## ACCESSORIES

### *Atractive and sturdy, suitable for all types of marking (photoluminescent/normal)*

Sturdy frames are made of aluminium. To install markings on escape routes, emergency exits, hospital emergencies and fire-fighting safety. Easy installation of signs without tools.

#### Safety signs frame

Material: Aluminium/hard fiber, lightweight silver

15x15 cm sign Width: 15,8 cm, Height: 15,8 cm

Code DMR90.3043

30x15 cm sign Width: 30,8 cm, Height: 15,8 cm

Code DMR90.3045

20x20 cm sign Width: 20,8 cm, Height: 20,8 cm

Code DMR90.3047

40x20 cm sign Width: 40,8 cm, Height: 20,8 cm

Code DMR90.3049

Safety key

Code DMR90.3050

Anti-theft device

Code DMR90.3051

Other shapes, sizes (for example, 30 x 30 cm) or materials, such as acrylic glass front cover on request.

Other frame colours are also available on request. Complete solutions always on request.

#### "Cube" for a unique and original design

Material: White aluminium, with 4 holes for its installation on ceiling

Length: 40 cm, Width: 40 cm, Height: 40 cm

Code DMR90.4997

Length: 20 cm, Width: 20 cm, Height: 20 cm

Code DMR90.4998

#### Connectors - chains

Material: metal wire 1,6 mm thickness

(connectors length on request )

Code DMR90.9122

#### "S"-shaped hooks

Material: metal wire 2 mm Thickness

Serie = 10 pieces

Code DMR90.9124

## CONVENIENT MOUNTING

You have bought a high quality product. In order to ensure a perfect visibility, a permanent installation and the efficiency of our products we provide some useful information for you in this catalog. Please note that our standard products are generally designed for indoor use (exception: "Assembly point" aluminium sign).

If you need products for outdoor use, we would be pleased to send you a specific quote.

#### CLEANING - BASE AND SIGN

For installation through adhesion, the base must be uniform, clean and free of grease. We recommend alcohol (for example isopropanol). Please, pay attention to regulations concerning professional safety when you use alcohol. If it's not possible to treat correspondingly the base, these products must be fixed through mechanical tools (for example screws and rivets). When you handle aluminium signs, please pay attention to their edges, that are sharper than those of Film signs.

#### INSTALLATION - WITH ADHESIVE PADS

We recommend our adhesive pads that are made of foam glue to install aluminium or other solid materials.

Procedure: clean the base as described above. Use at least 4 adhesive pads (1 sheet) for one sign.

Please note that there could be any residues when you remove adhesive pads.

This is the reason why the signs position must be carefully checked in advance. After a pad has adhered to the sign, it is no longer possible to reposition it without damaging the product and/or its base.

#### Convenient mounting: Adhesive pads

Code DMR90.9129 (1 sheet = 4 pads)

## CORRECT MOUNTING

### POSITIONING - Visible above the door

Escape signs must be installed on a reasonable place and be visible at any time. This is the reason why escape signs **MUST NOT** be installed on door leaves because they could be opened in case of emergency, and therefore they could no longer be visible.

### POSITIONING - Perfect perceptibility

Escape direction and information about fire-fighting equipment must be visible from any position along the escape route. There's a formula to calculate the "Perception of width" for the correct sizing of signs.

$$E = h \times z$$

E = Width Perception

h = Sign height

z = distance factor (100 for illuminated signs).

Please note that this formula is based on optimal conditions of sight. In case of doubts, you should rather use a bigger sign or a greater number of signs.

### ACTIVATION - Incidence of light

#### Luminous source

Photoluminescent products are activated by luminous sources composed of blue light. Daily light, fluorescent lamps and many LED lamps are suitable for photoluminescent material loading. If you have any questions about what luminous intensity (in lux) of the product is sufficient or optimal, do not hesitate to contact us. Previous recommendation of DIN 67510 with 25 lux of a luminescent lamp with 4.000 K can no longer be applied safely because of the variety of different photoluminescence products and types of lamps; but it is still a reference value. We recommend from 40 to 50 lux for permanent lighting of a HI 150 product.

Please make sure that signs are installed inside the light beam. The more frontal the light beam is, the better the loading result will be.

### MATERIALS - Aluminium / Film

We use high quality aluminium films and materials for our safety signs. However, alternative materials can be requested depending on environmental conditions. We will be pleased to give you advices in this regard.

All products comply with "DIN 67510" norm and with "REACH" regulation.

For further information about safety measures and positioning, please refer to DIN SPEC 4844-4 rule.
